PERSONAL PROJECTS

Clumsyknight's Blog - Built using React

- Technologies used React, Node, Express, Rest API, mongoDB
- Divided into three parts

1. Blog API

- RESTful API built with endpoints for authentication and database management.
- Blog-Read and Blog-Write work as Frontend for this API.
- Live: <https://clumsy-blog.herokuapp.com/>
- Repo: <https://github.com/Clumsynite/blog-api/>

2. Blog Read

- Frontend built to read blog posts.
- Uses Blog API for authentication and database management.
- Live: <https://clumsynite.github.io/blog-read/>
- Repo: <https://github.com/Clumsynite/blog-read>

3. Blog Write

- Frontend built to make new posts.
- Uses Blog API for authentication and database management.
- Live: <https://clumsynite.github.io/blog-write/>
- Repo: <https://github.com/Clumsynite/blog-write>

Inventory App - CRUD App

- Built using Node, Express, Bootstrap, Pug and mongoDB
- Built in order to practice CRUD operations using mongoDB
- Uses pug template engine to render views
- View live: <https://clumsy-inventory.herokuapp.com/>
- View code: <https://github.com/Clumsynite/inventory-app>

Weather App - Built using Vue - APIs used

- Created using HTML, CSS, JS, Vue
- Uses OpenWeatherMap API to display weather stats
- Uses giphy api to display gif according to weather
- View live: <https://clumsynite.github.io/weather-app/>
- View code: <https://github.com/Clumsynite/weather-app>
